Kudos to Tracey Canfield for putting together some of the most exciting coherent, well thought-out, story and character rich, cohesive choice games I've played yet. and i've played a lot of these. I love the choices we can make and how it affects who we are and how we evolve as a character is simply a marvel. the stats and personal character development don't feel tact on like many other games like this feel. One of the best Choice games to date.
