With a GTX 970 in SLI it is possible to play the game at about 900MHz under load. While using a GTX 1080 Ti is possible, it is unlikely - the game simply cannot reach that level of performance. For the highest level of performance we tested, the maximum performance we could produce with the AMD RX 480 was about 500-600MHz. If we don't use a GTX 980 Ti SLI, though, the performance falls off significantly. For reference the maximum performance we could produce was roughly 200-250MHz GB.. 2.
